

Quality Circle & Continuous Improvement Management System

A unified digital platform to institutionalize 8-stage 8D problem solving, automate 7 QC tools, and accelerate plant excellence every single day.

Why Quality Circle Management System?

Transforming fragmented shopfloor improvement efforts into a structured, measurable engine.

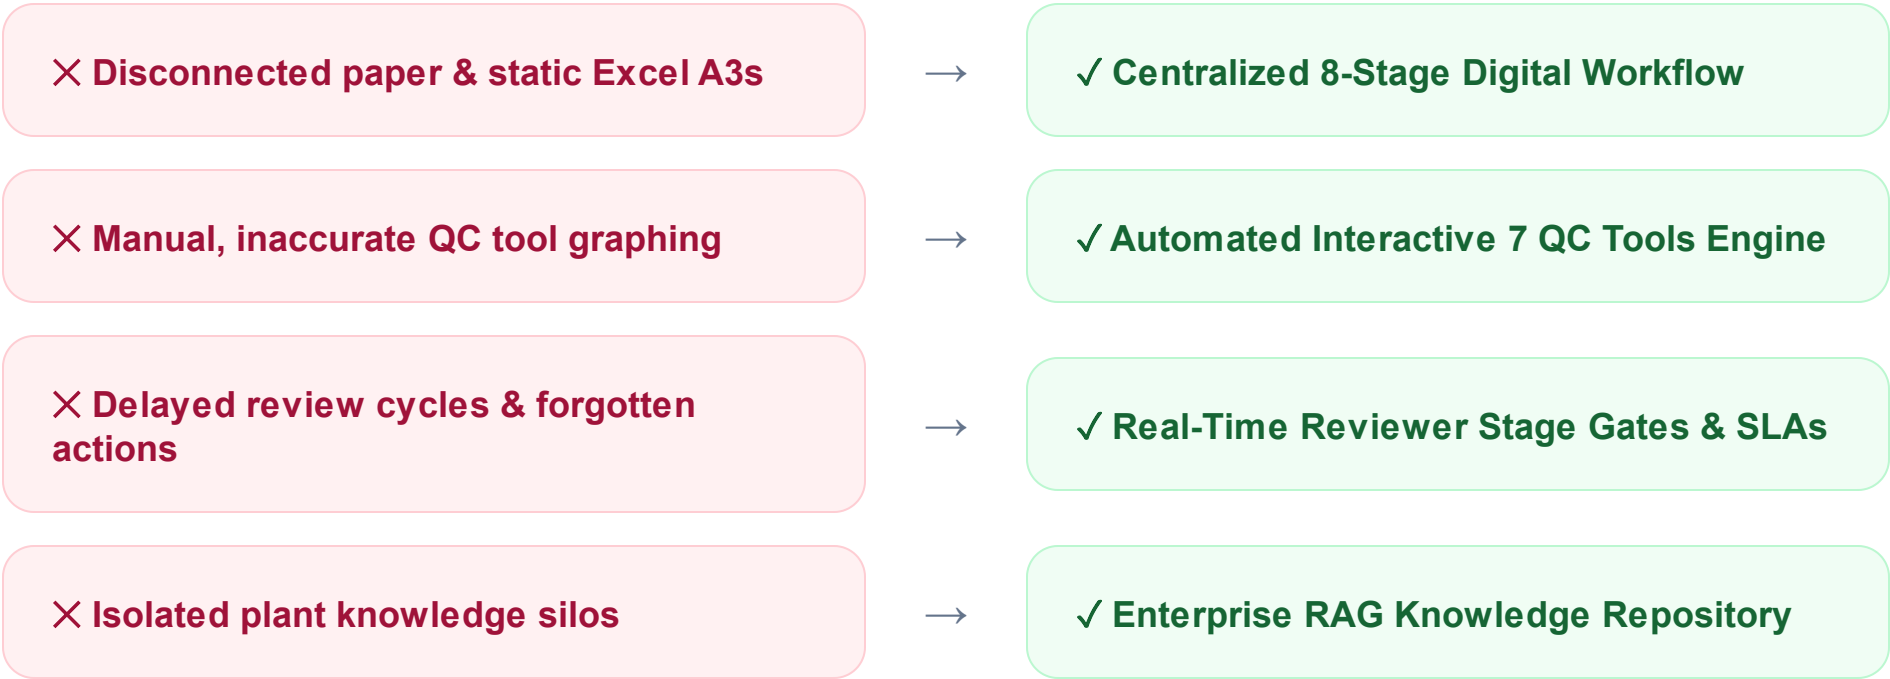

WHY WE ARE DOING THIS

Across manufacturing shifts, teams generate thousands of critical quality data points—defects, downtime, root causes, and kaizen ideas. Today, this knowledge remains trapped in paper forms, static Excel sheets, and disconnected presentations.

The Result: Standardize methodology, eliminate recurring defects 80% faster, and unlock measurable financial ROI.

Objective — Provide seamless end-to-end governance from Operator to Reviewer & CEO.

WHAT CHANGES WITH QCMS

What is QCMS Enterprise OS?

The foundation for institutional quality: standardizing daily execution and continuous Kaizen.

QCMS is the enterprise operating system for managing Quality Circles, 8D Problem Solving, and Six Sigma projects. It bridges the gap between shopfloor operators, facilitators, and executive management.

1. Standardize (8 Stages)

Enforce rigorous 8D workflows: Problem Definition (5W2H) → Observation → Cause Identification → Root Cause Validation → Countermeasures → Verification → Standardization → Team Recognition.

2. Automate (7 QC Tools)

Instant auto-generation of Pareto Charts, Ishikawa Fishbone, Before/After Histograms, Control Charts (SPC), Scatter Correlation, Checksheets, and Stratification.

3. Govern (Review Gates)

Multi-tier signoff workflows, stage-level revision requests, immutable audit logs, facilitator assistance channels, and executive ROI dashboards.

Role-Wise Data Flow & Governance

Four distinct user tiers with strict role-based access control and tenant isolation.

USER TIER / ROLE	OPERATIONAL DATA FLOW	CORE DATA ENTRY	EXECUTIVE REPORTS
Super Admin Platform Level	Onboard Org → Assign Plan & Quota → Global Stage Templates	Tenants · SaaS Plans · Platform Settings	Global Platform Analytics · Audit Logs
Plant Head / CEO Executive Level	Set Plant KPI Targets → Review Dept Health → Approve ROI & Rewards	Plant Config · Department Thresholds	CEO Cockpit · Plant OEE · PDF Export
Reviewer & Facilitator Governance Level	Validate Stage 1-8 → Resolve Assistance → Signoff Stage Gate	Review Decisions · Comments · Revisions	Stage Gate Tracker · Reviewer Matrix
Team Leader & Members Shopfloor Team Level	5W2H Definition → Interactive 7 QC Tools → Submit Stage for Approval	7 QC Tools Data · 5-Why · Action 3W1H	Project Case Study PDF · Kaizen Summary

High-Level System Architecture

Enterprise-grade multi-tenant stack engineered for high concurrency and audit compliance.

Executive & Plant Head Dashboard

A single real-time cockpit providing top-floor visibility into plant quality and financial ROI.

Real-Time Financial & KPI Metrics

Automatically tracks cost savings, KPI improvements, and annualized ROI from Stage 7 validations.

Automated Attention Flags

Identifies stalled stages, SLA breaches, and inactive circles before deadlines are impacted.

1-Click Executive PDF Export

Generates board-ready audit reports and department benchmark presentations instantly.

Reviewer & Facilitator Governance Hub

Rigorous stage-gate approvals, methodological guidance, and statistical validation oversight.

PRJ-2026-029 · Stage 7: Control Chart Stability Verification

Revision Required

Strict Stage-Gate Enforcement

Teams cannot skip steps or jump to solutions without formal Reviewer approval of root causes.

Two-Way Facilitator Assistance

Direct messaging and mentoring channels per stage to resolve tool selection and statistical doubts.

Immutability Snapshots

Approved stages are permanently snapshotted and locked for regulatory and audit compliance.

Team Leader & Member 8D Workspace

Interactive quality tool workbench designed for high usability and intuitive team collaboration.

In Verification

Guided 8-Stage Progression

Step-by-step forms pre-filled with project team metadata, automated dates, and 5W2H problem scoping.

Native 7 QC Tools Rendering

No third-party drawing software needed—enter raw shopfloor data and instant charts render automatically.

AI Quality Co-Pilot

Instant historical suggestions from past archived projects across the enterprise.
